Water Conservation

Water Conservation is the process to save water in many interesting ways. So, once our teacher teach us about many ways to conserve water. But my friends used water unnecessarily. So, I found it easy to teach and motivate my friends with the help of my teacher. So, then I went to my teacher's house with my friends. She firstly explained that water is very necessary for our living without drinking water, bathing and without doing such works we can't survive on the planet earth. She also gave some practical examples like she made a pie chart showing the percentage of the water. It was just only 0.03 percentage of fresh water on the earth.

My friends asks the question that how can we celebrate Holi without water. So, she said that celebrating Holi with water is not necessary, we can celebrate Holi with dry colours. It also cannot effect the environment. She explained that the factories cause wastage which they outlet in the water bodies. So, it will be harmful for the human life and animals. Plant life is also affected due to this water. Many tribes and villages permanently settle there for many reasons of survival but due to the impure, bacterial wastage out let from

Factories the water get spoilt and many marine animals, terrestrial animals and humans die by drinking this water. Human only think for their benefits not for the benefits of the nature and environment. We should conserve water by repairing all the taps and maintaining, checking that not a single tap should be leaked out. You can do rainwater harvesting and use this water for mopping floors or washing cars. In some villages, the method of roof top harvesting is been used to solve the problems of water shortage. Some famous personalities like Dia Mirza and Ayesha Shah have started campaigns and organizations to save water. Water is one of the most precious gifts of mother earth. Water is most important and essential for the survival of our body. The 70% of human body structure is made with water. Without water, the electricity cannot be produced. It is declared by the government that in 2025, the water will end on the earth. We should motivate and encourage people to conserve water and save the mother earth.
